SCOPE
This guide outlines the correct step-by-step procedures to follow when connecting to a printer within the University of Wollongong Library. Although tested using OSX 10.2 this guide should provide enough information for other MAC operating systems to successfully connect to the printers within the library.

1. Open Finder
2. Browse to Applications/Utilities
3. Open Print Centre
4. Click Add
5. Select IP Printing in the dropdown
6. Under Printer's Address type: 130.130.51.5
7. Deselect Use default queue on server
8. Under Queue Name type one of the following queue names:
   a. GndEast1 Printer
   b. GndEast2 Printer
   c. GndSouth1 Printer
   d. GndSouth2 Printer
   e. Second Floor Printer
   f. First Floor Printer
   g. Lib_Colour
   h. Special Collections Printer
   i. CRC Printer
9. Under Printer Model select Generic
10. Click Add
11. If you receive the warning: Some LPR print servers will not work with a space in the queue name click Continue.
12. The printer will now appear in the printer list and you will be able to select this printer in your applications.
